We support mothers who have chosen to breastfeed by providing high quality products at prices every mother can love.

Preserving Mother's Love, One Expression At A Time

Our Vision

We feel it is our duty to provide mothers and their families with the best breastfeeding products available to support them along their maternal journey. We offer high quality products at affordable prices so that every mother can enjoy the best breastfeeding experience possible.

Our Mission

As providers of the world's highest quality and affordable breastfeeding products, we strive to enrich the lives of mothers around the world.

Our History

In 2011, Rumble Tuff was acquired by A Cute Baby Inc. for expansion into a comprehensive baby and maternity care brand. We are committed to promoting wellness and happiness for mothers and their families by bringing clever and innovative ideas to the market.

We manufacture and sell electric and manual breast pumps, contour changing pads, ultra-plush pad covers as well as innovative baby healthcare products, including the Rumble Luv baby care gift sets.

We are committed to providing every mother with the best experience possible with Rumble Tuff maternity products.

Rumble Tuff Comparison Chart

We are happy to introduce four of our breast pump models currently on today's market:

Sweet Essence
Manual Breast Pump

The Sweet Essence Manual Pump is a light weight and travel-friendly pump for busy women. Easy to clean and easy to use with an adjustable suction level, Sweet Essence is perfect for mothers who want complete control over their milk expression.

Easily operated with one hand, the Sweet Essence Manual Pump provides two levels of suction strength to customize a mother's milk expression. The vacuum adjustment knob located on the pump's diaphragm allows the user to manually adjust the pump's suction strength to best imitate their baby's nursing pattern.

Sweet Assist
Manual Breast Pump

The Sweet Assist Manual Pump is designed to address fatigue and muscle strain commonly found in using traditional manual pumps. The Sweet Assist allows mothers to use their pump one-handed or two-handed with the convertible Assist Handle, and it can provide a unique bonding opportunity for an assisting partner.

The wide, ergonomic design of the Assist Handle provides a better fit for mothers with smaller hands or medical arm injuries.

Our patented Pressure Release Valve provides extra comfort and safety for the user by giving her control over the pump's vacuum pressure. It prevents over-vacuum and swelling of the nipples, and allows for easier separation from the pump.

Sweet Assist marries a sleek and uniform design with easy-to-operate, unique, pain-alleviating pump features. Like Rumble Tuff Electric Pumps, Sweet Assist has two vacuum & suction settings, providing mothers with more control over their pumping sessions without restricting them to power outlets.

Easy Express
Electric Breast Pump

Quiet, easy to clean and travel-friendly, the Easy Express Electric Breast Pump is ideal for occasional pumping. The Easy Express is a closed system, single electric pump intended for personal use

The Easy Express is an economy pump with an Anti-Backflow Diaphragm, a closed system which keeps milk out of the tubing and electric motor. Built with comfort in mind, the Easy Express Expression Button and Vacuum Adjusting Wheel imitate a baby's nursing pattern with 4 preset suction speeds and 7 levels of suction strength. The pump also comes with a Bottle Adapter Kit, allowing mothers to serve milk to their babies straight from the collection bottle.

Mighty Tyke
Portable Electric Breast Pump

Lightweight and compact in size, Mighty Tyke is a portable electric breast pump ideal for mothers on the go. The powerful, yet quiet, vacuum motor can be powered by the Li-Ion Rechargeable Battery included with the pump or by the pump's AC adapter. This pump is perfect for use at home, at work or during travel.

The pump is uniquely designed with a built-in belt clip, providing more freedom and greater mobility for busy mothers. The simplified control panel also allows easy access from all angles, whether the pump is stationary or at the user's side.

Users can toggle between the Reflex, Swift and Natural expression patterns, which mimic a baby's nursing pattern and can be used to customize a mother's pumping experience.

Glory Express
Duo Electric Breast Pump

Weighing less then a pound, the Glory Express is a small powerhouse for quick milk expression. The whisper-quiet motor is convenient for home or travel and discreet enough for the office.

The Glory Express features the M Button (My Favorite Mode) which replicates the mother's favorite pumping pattern, making the pumping session an relaxing and enjoyable experience.

The Glory Express Duo's first pattern, Reflex, imitates the reflexes of a hungry baby when they first latch on with stronger vacuum suction for the first 15 cycles of pumping. The pumping cycle automatically transitions into the second expression pattern, Swift, which reduces suction to a fast and shallow pattern. Mothers can choose whether or not to remain at this phase if their baby has a similar nursing pattern or they can switch to the final phase of the cycle. The third pattern, Natural, consists of long and deep suctioning, mimicking how most babies obtain milk from their mother's breast. Both the Swift and Natural expression patterns have up to eight levels of vacuum suction to suit the individual's comfort level.

Serene Express
Duo Electric Breast Pump

The Rumble Tuff Serene Express Duo Pump is a double electric breast pump combining the effectiveness of a hospital grade breast pump with the convenience of a portable pump. This pump is designed with 3 Expression Patterns and 8 vacuum suction levels, allowing mothers to customize their pumping patterns to mimic their baby's nursing habits. By customizing the 3 Expression Patterns to imitate a baby's changing habits as they grow, mothers can stimulate proper milk production.

The Serene Express is built with the innovative memory M Button, or 'My Favorite Mode' button, which allows you to customize your pumping session. Once you have chosen your preferred strength and expression settings, press the M button to record your suction pattern routine and the Serene Express will remember it for your next pumping session.

The Vacuum Adjusting Wheel located on the pump's main unit easily adjusts the suction between eight levels of suction strength. The Serene Express also comes with an Expression Button, allowing you to toggle between three milk expression patterns: the Reflex Express, Swift Express and Natural Express.

Love Express
Duo Electric Breast Pump

The Rumble Tuff Love Express Duo Pump is as strong and customizable as our Serene Express, and comes with a rechargeable Lithium battery, providing mothers with a convenient alternative power method.

With 3 expression patterns and 8 vacuum suction levels, the Love Express Duo's durability and dependability make this pump ideal for frequent pumping. This double pump can also be electric-powered, battery operated or converted into a manual breast pump!

The Love Express features the M Button (My Favorite Mode) which replicates the mother's favorite pumping pattern, making the pumping session an relaxing and enjoyable experience.

The Vacuum Adjusting Wheel located on the pump's main unit easily adjusts the suction between eight levels of suction strength. The Love Express also comes with an Expression Button, allowing you to toggle between three milk expression patterns: the Reflex Express, Swift Express and Natural Express.
